

SYED IMADULLA

Bengaluru, Karnataka | imadulla.s45@gmail.com | (+91) 63629 21911 | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-stack developer with a 9.40 CGPA, having merged **10+ pull requests** across the GSSoC and Hacktoberfest open-source programs. Builds and ships full-stack web applications with React.js, Node.js, and RESTful APIs — including an AI-powered productivity platform that **cut task-organization time by 30%** — and actively contributes to production codebases used by real maintainers.

EDUCATION

B.E. in Computer Science — S J C Institute of Technology, Chikkaballapur

2024 – 2028

CGPA: 9.40 / 10.0

CERTIFICATIONS & ACHIEVEMENTS

- **Super Contributor** — Hacktoberfest 2025
- **Postman API Fundamentals Student Expert** — Postman
- **Contributor** — GirlScript Summer of Code 2025
- **AI Literacy (Generative AI & Ethics)** — IBM SkillsBuild
- **Full Stack Web Development** — IStop.ai
- **TCS TechBytes 2026** — Represented SJCIT at the statewide Engineering IT Quiz

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, C

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs

Database: MySQL, MongoDB, Oracle

Tools: Git, GitHub, Postman, Figma, Docker

EXPERIENCE

GirlScript Summer of Code (GSSoC'25) — Open Source Contributor

Jul 2025 – Oct 2025

Remote

- Resolved **10+ critical bugs and feature requests** across multiple high-traffic repositories, achieving a **100% PR merge rate**, by writing production-ready pull requests reviewed by global maintainers
- Maintained **zero version-control conflicts** across all contributions, measured by consistent code-quality approval, by following strict Git/GitHub workflows and each repo's contribution standards
- Earned a **Certificate of Appreciation** by consistently delivering high-quality, review-ready code across the contribution period

Hacktoberfest — Open Source Contributor

Oct 2025

Remote

- Achieved **"Supercontributor" designation** (top-tier recognition) and Holopin Badges by authoring and merging high-quality pull requests across multiple global open-source projects
- Improved long-term maintainability for community-driven repositories, measured by accepted documentation and refactoring PRs, by identifying and resolving code-quality gaps in production codebases

PROJECTS

StudyFlow AI — Student Productivity Platform

React.js, Node.js, Express.js, TypeScript, MySQL, REST APIs | GitHub: github.com/syed-imadulla/StudyFlow-Ai

- Cut task-organization time by **30%**, measured by user session data, by building an AI-powered productivity platform in React.js and Node.js with secure authentication and a dynamic scheduling dashboard
- Increased user engagement with study-planning tools by implementing scalable **RESTful APIs** for real-time AI assistance, backed by a MySQL store for user goals and session tracking

Smart Library Book Tracker

C++, JavaScript, REST APIs, HTML, CSS | GitHub: github.com/syed-imadulla/Smart_Library_Book_Tracker

- Improved administrative efficiency through centralized, live inventory oversight, measured by real-time dashboard sync accuracy, by engineering a **C++ REST API backend (httplib)** with efficient CRUD operations for complex inventory data

Profitify: AI Grocery Tracker (Hackathon Project)

Python (Django), REST APIs, OpenAI API, SQLite | GitHub: github.com/syed-imadulla/cipher_37

- Achieved a **40% reduction** in manual input, measured by expenditure-tracking accuracy, by integrating the **OpenAI API** to automate expenditure analytics and intelligent reorder notifications for household budget management
