PROFESSIONAL SUMMARY

Computer Science undergraduate (Class of 2028) with a CGPA of **9.40/10**, passionate about full-stack software development and open-source collaboration. Contributed **10+ merged pull requests** through GSSoC and Hacktoberfest while building modern web applications using React.js, Node.js, Express.js, and MySQL. Seeking a Software Engineering Internship to contribute to impactful products and grow as an engineer.

EDUCATION

B.E in Computer Science

2024 - 2028

S J C Institute of Technology, Chikkaballapur | CGPA: 9.40/10

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, C

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js

Developer Tools: Git, GitHub, Postman, Figma, Docker

Database: MySQL

Currently Learning: MongoDB, REST APIs

OPEN SOURCE EXPERIENCE

GirlScript Summer of Code (GSSoC'25) | Open Source Contributor

July 2025 - Oct 2025

Remote

- Successfully merged **10+ pull requests** across multiple high-traffic repositories, directly improving feature sets and resolving critical bugs.
- Partnered with global maintainers using Git and GitHub to maintain **100% version control accuracy** and adhere to strict code quality standards.
- Earned a **Certificate of Appreciation** for significant contributions to the open-source ecosystem.

Hacktoberfest | Open Source Contributor

Oct 2025

Remote

- Authored and merged high-quality pull requests in global projects, resulting in the **"Supercontributor"** designation and Holopin Badges.
- Improved code maintainability and documentation for community-driven projects, gaining hands-on experience in real-world software maintenance.

PROJECTS

StudyFlow AI - Student Productivity Platform | [GitHub](#)

React.js, Node.js, Express.js, MySQL

- Built an AI-powered student productivity platform using React.js and Node.js to streamline task management and scheduling.
- Implemented secure authentication and a dynamic dashboard, increasing user engagement with study planning tools.
- Developed scalable RESTful APIs to handle real-time AI assistance, reducing task organization time by 30%.
- Integrated database management with MySQL to ensure robust storage for user goals and session tracking.

Smart Library Book Tracker | [GitHub](#)

C++, JavaScript, HTML, CSS

- Developed a C++ backend using httpLib to handle inventory management through REST APIs.
- Engineered **efficient CRUD operations** for complex inventory data retrieval.
- Created a responsive web-based interface for live monitoring, enhancing administrative efficiency through **centralized oversight**.

Profitify: AI Grocery Tracker (Hackathon Project) | [GitHub](#)

Python (Django), AI Integration, SQLite, HTML/CSS

- Built an AI-driven grocery tracking system using Python (Django) and SQLite, optimizing household budget management.
- Integrated OpenAI API to automate expenditure analytics, achieving a **40% reduction in manual input** via intelligent reorder notifications.

CERTIFICATIONS & ACHIEVEMENTS

GirlScript Summer of Code 2025 – Open Source Contributor

Hacktoberfest 2025 – Super Contributor

TCS TechBytes 2026 – Represented SJCIT at the statewide Engineering IT Quiz

IBM SkillsBuild – AI Literacy (Generative AI & Ethics)

Postman API Fundamentals Student Expert

Full Stack Web Development – 1Stop.ai
